Motivations

Driver partners find this job to be,

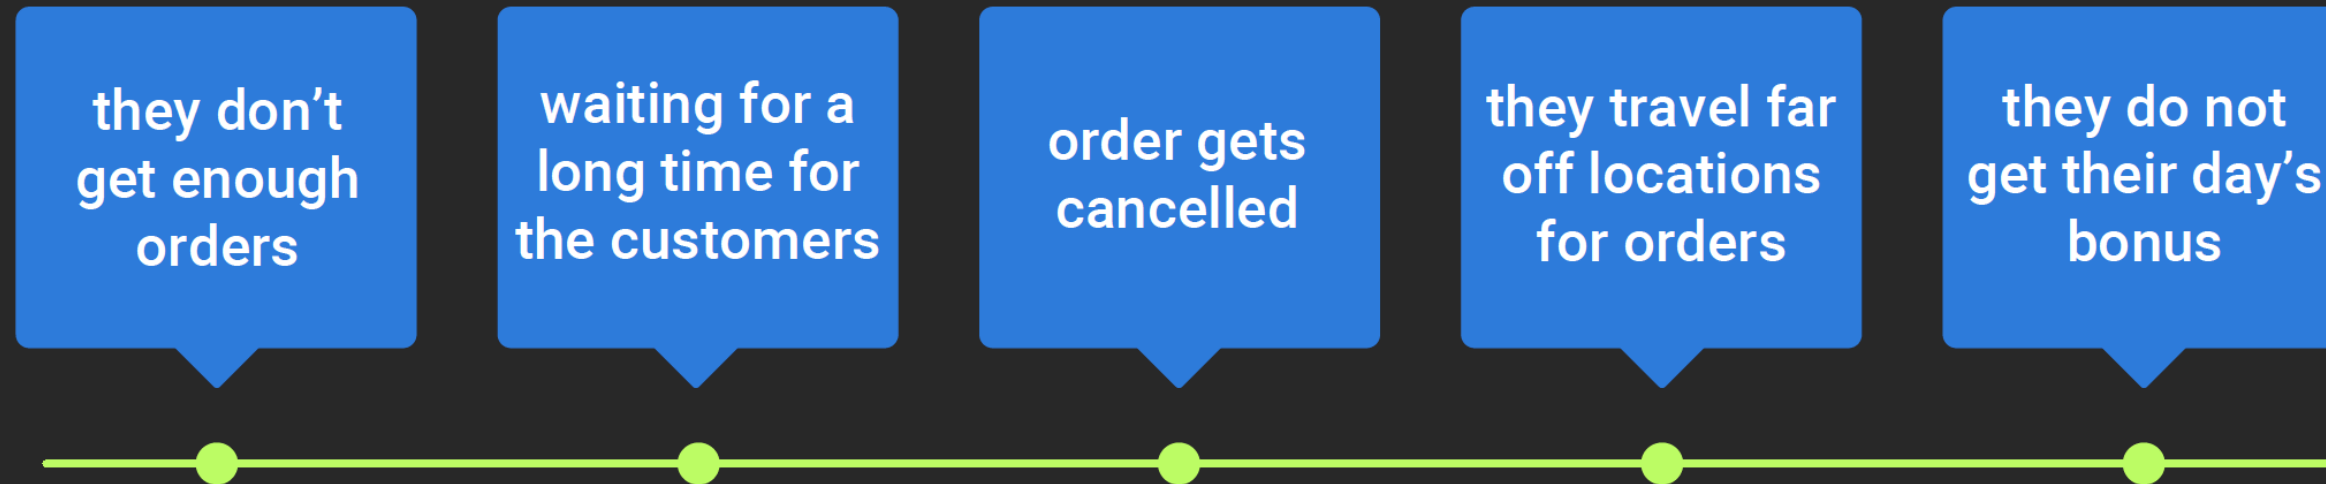

Other Observation:

- Doesn't need much qualification to be a driver partner
- New joiners find this job to be fun to earn extra money
- Driver partners don't explore other job opportunities
- Driver partners stick to go-jek as they feel it's their homegrown company
- Because of its flexibility, driver partners find this job to be better than working from an office
- Driver partners can choose when they want to work and when not

Frustrations

Driver partners are frustrated when,

Other Observation:

- Driver partners are afraid if their health will support for this job on a long run
- For cash on delivery food services, driver partners need to have certain amount of cash in their wallet to take up the orders
- Driver partners are afraid to cancel any order, as its difficult to get orders once an order is cancelled
- Driver partners are continuously conscious about their phone battery and phone safety
- Driver partners are frustrated when they are unable to fulfil their daily targets/points

Similarities between Indian and Indonesian Market

- Navigation is used only for 15% - 20% of the orders
- Customer phone calls are rare while on-the-go
- Multiple orders are not bundled together
- In Go-Food, the restaurant starts the food preparation only when the driver partner reaches in person and confirms the order
- Driver partners who work in this industry do not have much of educational qualifications and they don't know any other job opportunities
- Driver partner want to get more orders

Women Go-jekers

- Only 10% of Go-Jek driver partners are women
- They find this job safe
- Women at the age group of 25 - 30 works full time
- Women who have to balance their family works part time after completing their responsibilities

Go-Ride:

- There are times when customers cancel the order when the order is assigned to a woman driver partner
- Sometimes, the male customers ask them to sit behind while the customer themselves ride the bike till the destination, they agree to this to avoid order cancellation.

Empathy Maps

SAYS

- Does not want to do any other job as this is more flexible
- Likes to be a part of job as he has made good work friends
- Works for 6-7 hours a day after college as a student

THINKS

- Wants to increase income
- Moving around areas will give more orders
- Cancelling any order may affect getting new orders for rest of the day

Malik - Part Timer

DOES

- Spend time with friends in the group when they do not have orders
- Waits in shops and smoking areas with co workers
- Once they hits the target for the day, doesn't try much to get more points

FEELS

- Would like to continue this job even after graduation
- They find this job gives them more control on their earning and work life

Empathy Maps

SAYS

- Keep moving to different locations for orders
- Want the incentives to be increased for each order
- Most of the customers are kind and understanding if there is a delay due to traffic

THINKS

- Wants to increase the orders
- Wants to achieve target - everyday
- Afraid that this job can compromise health in the long run

Bapak Yanto - Full Timer

DOES

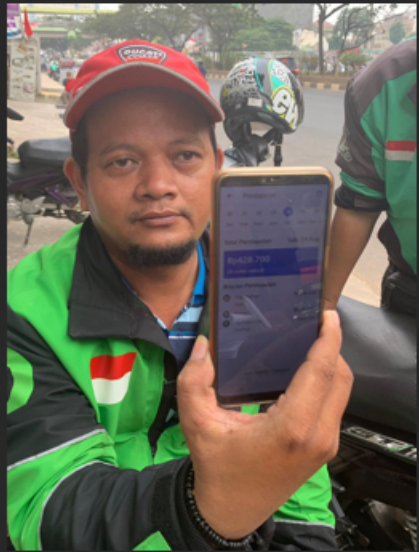

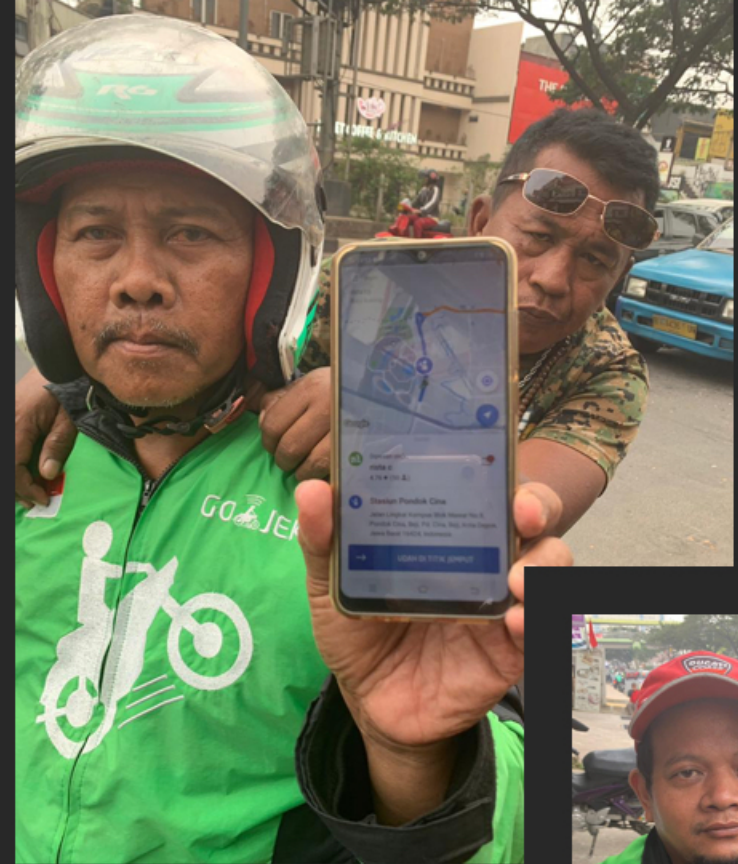

- No need of navigation when the customer navigates to their location
- Use WhatsApp group to share communication on traffic, customer feedback, traffic police location amongst themselves

FEELS

- Wants to work less and earn more
- Happy with this job as its extremely flexible
- When they don't get much orders through out the day, they feel it was not a lucky day
- Feels that because of too many driver partners in recent days they get less orders

Key Findings

- Safety is a concern
 - - Driver partners do not work in rain
 - - Driver partners are completely covered with mask, gloves, helmet and jacket
- Most of them prefer this job because of its flexibility and decent income
- They communicate with each other using Whatsapp groups to keep informed about traffic, traffic police, customer attitude and promos & ask for help in case of breakdowns
- Driver partners do not use ear-phones instead, stops the vehicle to answer/make calls
- Driver partners are worried to mount their phones on the dashboard due to safety issues
- Driver partners spend 75,000 IDR for data per month. (costlier than India)
- There are no order radius defined, but the system intelligently learns the preferred locations of the driver partner
- The waiting time are lower in Indonesia as compared to India
- While waiting, driver partners do not spend time watching videos on phone, as they are concerned about the impact on battery life

Thank You
